

IBC Registered Installation Facilities

Note to consumers

Any theft deterrent system, no matter how well designed or built, is only as good as the quality of its installation. Having a **IBC Approved Theft Deterrent System** (currently approved systems: **Autowatch 329Ti**, **Powerlock-Canada**, **MasterGard M6000** and **Theftbuster TB300V** immobilizers) installed by a **IBC Registered Installation Facility** ensures that both the device installed and the manner in which it was installed are of superior quality and have the best chance of keeping your car in your hands. This also helps make it possible for the system protecting your vehicle to maintain its high degree of effectiveness, for the life of the vehicle.

By registering with IBC, Installation Facilities listed on this document have agreed to abide by the installation protocol document "**Installation of Aftermarket Automobile Theft Deterrent Devices**" ULC/ORD-275.1-00. Among other things, this protocol requires registered facilities to:

- Follow manufacturer's recommended installation instructions. (Section 7.7)
- Solder and seal all wiring connections. (Section 7.11)
- Vary the placement of installed wires and components from vehicle to vehicle. (Section 7.6)
- Have the necessary tools and equipment. (Section 4.1)
- Have access to vehicle wiring diagrams. (Section 4.2)
- Have the necessary technical training or experience. (Section 5.2)
- Have "errors and omissions" liability insurance coverage. (Section 3.4)
- Have personnel undergo criminal background checks. (Section 5.1)
- Register with IBC all installations of IBC approved aftermarket theft deterrent devices. (Section 6)

It is strongly recommended that consumers first call the listed IBC Registered Facilities to book an appointment for installation. Not all IBC Approved Installation Facilities install all Approved Systems. To learn more about the IBC Approved Theft Deterrent Program, visit our website at www.ibc.ca.
